PROFILE

B.Sc. (Hons.) Computer Application student at Aligarh Muslim University who learns by building complete, usable systems. Practical experience spans React/Node full-stack development, databases, authentication, payments, Android integration, deployment, and production debugging.

EDUCATION

Aligarh Muslim University — B.Sc. (Hons.) Computer

Jul 2025 – May 2029

Application

Department of Computer Science | Semester I: 8.90 SGPA | Semester II: 8.18 SGPA

Relevant coursework: Data Structures in C, Digital System Design, Intro to IT;

Currently studying : Object-Oriented Programming in Java, Computer Architecture.

Class XII (PCM) — Saiyyid Hamid Senior Secondary School (Boys), AMU, 2025 — 75.4%

Class X — MIF Inter College, UP Board, 2022 — 86.66%

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, C, SQL

Frontend: React, Vite, React Router, Tailwind CSS, HTML/CSS, Axios/Fetch API

Backend & Data: Node.js, Express.js, REST APIs, JWT/authentication, MongoDB/Mongoose, PostgreSQL/Prisma

Mobile & Integrations: Capacitor, Android Studio, Android SDK, native Java integration, Razorpay

Deployment & Tools: Git, GitHub, Linux, Azure VM, Nginx, PM2, Cloudflare Pages, Render, Neon

SELECTED PROJECTS

WarbLink

Founder & Developer | Jul 2026 – Present

Conceived and built a production education marketplace connecting students/parents with tutors, including tutor discovery, public profiles, request workflows, membership payments, admin functionality, email notifications, and analytics.

Built most of the React/Vite/Tailwind frontend independently and co-developed the Node.js/Express/MongoDB backend with a senior collaborator; integrated authentication, Razorpay order/payment verification, and webhook flows.

Converted the product into a Capacitor-based Android app with native Java/Razorpay SDK integration, signed APK releases, and a shared production API deployed behind Nginx/PM2 on an Azure VM.

NoorForge

Developer | Oct 2025 – Present

Built a student developer platform with React, TypeScript, Vite, routing, authentication, protected member dashboard, project/learning pages, reusable components, and a contact workflow.

Implemented a TypeScript Node/Express backend with JWT, bcrypt, Prisma and PostgreSQL; deployed the frontend on Cloudflare Pages, backend on Render, and database on Neon.

EXPERIENCE

AZFAR FOUNDATION, Aligarh — Mathematics

Jul 2025 – Jun 2026

Instructor → Senior Math Mentor → Branch Manager

Taught Mathematics to approximately 20–30 Class 9–10 students preparing for Class 11 entrance examinations, using structured, step-by-step explanations in Algebra, Geometry, and problem solving.

Progressed to Branch Manager and handled branch finance/accounting work in Excel, including fee records, expenses, monthly accounts, and other money-related records, while continuing teaching responsibilities.
